

PRESCRIPTION DRUG DATA COLLECTION (RXDC)

Under Section 204 of the Consolidated Appropriations Act, 2021, all insurance companies and employer based health plans (regardless of size and funding type) submit information about prescription drugs and healthcare spending. The data submission is called the RxDC report and must be submitted annually, by June 1st, through CMS HIOS Portal. Your first stop should be to ask the Carrier what their position is then look for alternatives should you need help.

Pharmacy Financial & Utilization Data is DUE TO CMS June 1st Annually

Whether your client needs “hands on” assistance completing and/or understanding their carrier survey requests for the Rx DC reporting obligation to be fulfilled by the carrier/TPA or if the client is self/level funded and required to submit the P2 & D1 Files on their own behalf, ETC Broker Services can assist.

**If a deadline was missed, one year only services available.*

Service Options	Cost	Type
